

DOES YOUR CHILD TRY TO WANDER FROM SAFE SETTINGS?

MUSC Developmental Pediatrics is seeking volunteers for a research study involving **education and safety kits at no-cost** for families of children with autism who exhibit elopement behavior (bolting, wandering, taking off, fleeing, etc.)

Who can participate?

Families who...

- have a child with diagnosed Autism Spectrum Disorder (ASD) between the ages of 4 and 11 years

What is required?

Complete a brief survey before and after receiving kit
