

Scrub Hat Crown

Grain of Fabric

This should measure 1"

Scrub Hat

Materials:

Cheerful cotton fabric

Single fold bias tape in matching or contrasting color (one package is usually enough for three scrub hats)

When you print the pattern piece for the crown, be sure "actual size" is selected.

Directions:

1. Cut the crowns, placing the arrow along the grain of the fabric. To cut the tops, use a rotary cutter or scissors and cut a 3 ½ inch strip the width of the fabric. Cut this strip in half so you have two 3 ½ inch strips half the width of the fabric.
2. Placing right sides together, sew the crown to the top using a quarter inch seam. Press the seam toward the crown. Trim the edges at the back edge of the hat, if necessary, so they are even.
3. Open one of the folded edges of the bias tape. Place bias tape and hat right sides together at the back edge and sew using a quarter inch seam. Turn bias tape to inside and press. Stitch close to the edge.
4. Cut a piece of bias tape about 40 inches long. Open one folded edge of the bias tape and center it on the front of the top so that equal lengths hang on each side. These will be used to tie the hat. Sew the bias tape to the top using a quarter inch seam.
5. Fold the tape in half creating narrow ties and covering the raw edge of the top. Sew using a straight or zigzag stitch.
